

CLIENT CV / INFRASTRUCTURE LEADERSHIP

Micke Andersson

Senior Network & Infrastructure Architect | CTO Experience | Technical Manager

Senior infrastructure architect for environments where uptime, clean design and practical operations matter. I help organizations turn complex infrastructure into platforms that are stable, understandable and ready to grow.

24+

years hands-on infrastructure experience

200+

customers supported on cloud and WAN platforms

99.999%

availability delivered for core cloud services

Profile

My background combines CTO-level responsibility with hands-on delivery across datacentres, networks, virtualization, storage and daily IT operations. The common thread is resilient design: clear routing, high availability, strong troubleshooting habits and solutions that operations teams can trust after handover.

Core strengths

Networking & architecture

Core routing, BGP, MPLS, VXLAN, redundant Internet design and troubleshooting.

Cloud & virtualization

VMware, cloud services, VM migration, Linux/Unix knowledge and hybrid operations.

Storage & HA

NetApp, DataCore SAN, Fibre Channel, FCIP network design, backup and disaster recovery.

Operations leadership

Capacity planning, monitoring, incident response, vendor work and mentoring.

Selected experience

TrustIT Sweden AB

Stockholm | 2002-2022

Part Owner / CTO

- **Built the platform:** Co-founded and scaled a SaaS ISP into a full-service cloud provider with strong year-over-year growth.
- **Designed for resilience:** Built an enterprise datacentre with segmented networks, redundant power, VMware HA, NetApp and DataCore SAN.
- **Operated at scale:** Delivered dual-BGP Internet design, 99.999% availability and MPLS-style connectivity for 200+ Nordic customers.

Axstores

Stockholm | 2014-2019

Network Engineer (Consultant)

- **Restored performance:** Found and corrected OSPF issues that reduced throughput by up to 90%.
- **Modernized the fabric:** Designed a redundant four-site VXLAN network with L2/L3 mobility across sites.
- **Moved critical workloads:** Migrated 200+ Kicks business servers and rebuilt Axstores/Ahlens connectivity around new MPLS nodes.

Selected experience

Large-scale customer

Sweden | 2019-2026

Technical Manager & Interim IT Manager

- **Led complex design:** Owned network architecture and troubleshooting across client, server, guest, mobile, IoT and showroom networks.
- **Bridged strategy and delivery:** Acted as Solution Architect and Interim IT Manager, covering operations, budget, vendors and roadmap.
- **Raised team capability:** Mentored 12 junior technicians and 3 senior engineers in sustainable operations and incident prevention.

Representative projects

TrustIT CloudServices

Created the cloud platform foundation: resilient compute, storage, network and operations for 200+ customers.

Multi-site VXLAN fabric

Connected four sites with L2 over L3 so services could move and recover without long outages.

Kicks server migration

Moved a large business server estate with live migration, topology redesign and validation.

MPLS backbone expansion

Expanded the backbone and improved warehouse connectivity across the Nordic region.

Tools, automation and languages

- Bash, PowerShell and Python scripting.
- Monitoring with PRTG, Nagios, Zabbix and Datadog.
- Automation platforms including Ansible and Terraform.
- Swedish native, English fluent.

Technical focus

BGP, MPLS, VXLAN, Cisco Catalyst/ASA, pfSense, VMware vSphere/vCenter, Linux/Unix, NetApp, DataCore SAN, Fibre Channel, FCIP network design, backup, disaster recovery and high-availability operations.
